Total

Overall score for this test

Your score results are exceptional. Congratulations.

Object-Oriented Programming Concepts

This dimension measures your knowledge of the basic Object-Oriented Programming (OOP) concepts. As a software engineer we expect you to master the OOP concepts.

Your OOP knowledge is amongst the top of the class.

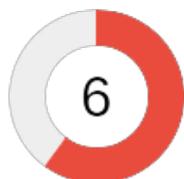

Relational DBMS Basics

This dimension tests your skills on the knowledge of the most essential relational database management systems topics.

Your score for this dimensions is amongst the best in the class.

Algorithms

This dimension measures your knowledge of algorithms, the big O notation and complexity.

Your score for the Algorithms is sufficient and matches our expectations.

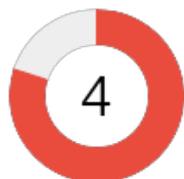

Computer architectures

In this dimension we test your knowledge of the computer architectures (CPU, RAM, registers, etc).

Your score for this dimension is amongst the best in the group.

Software Development Best Practices

This dimension tests your experience to spot badly written code and the knowledge of best practices in software development.

Your score is amongst the top of the group.
